Bacon Grill Sticks, Wrap System 600

## FOR UP TO 600 BACON GRILL STICKS PER HOUR. EASY, FAST AND SAFE.

Modern skewer wrapping system

### WRAP SYSTEM 600.

For the **professional production** of bacon grill sticks with **neck meat and other ideas**. The wrap system guarantees a reliable hold of the meat on the skewer during seasoning, weighing, packaging and barbecuing.

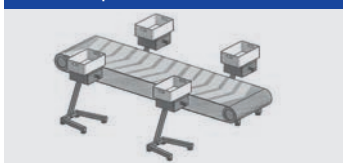

Wraps skewers automatically

### Like handmade, but much faster.

The system grips the skewer and meat and turns the product safely around the skewer, up to 600 times per hour. The **rotation speed is adjustable**. Suitable for round, flat and gun skewers (150-335 mm) with a diameter of 3-8 mm.

Perfect for production lines

### Available as single unit or production line.

Automatic production lines are possible with the Wrap System 600. Several units in combination enable a capacity of up to 4000 bacon grill sticks per hour.
